

The Robot Helper

Max built a small robot in his garage. The robot could sweep the floor, pack toys away and even feed the dog.

At first, Max thought the robot was amazing, But one morning, the robot packed away Max's school shoes by mistake. Max was late for school because he could not find them anywhere.

After school, Max changed the robot's instructions. He realised robots can help people, but they still need careful directions.

VOCABULARY

instructions

information that tells you what to do

garage

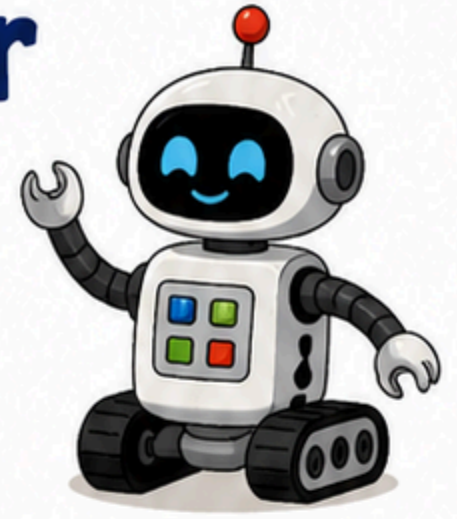

a building where cars are kept or things are stored

mistake

something that is not correct

The Robot Helper

COMPREHENSION QUESTIONS

1 Where did Max build the robot?

2 Name two jobs the robot could do.

a. _____ b. _____

3 Why was Max late for school?

4 What lesson did Max learn about robots?

5 If you had a robot helper, what would you like it to do for you? Why?

THINK DEEPER

Robots can be very helpful, but they still need careful instructions.

What could happen if a robot had the wrong instructions? Write or draw your ideas.

EXTENSION ACTIVITY

Design your own helpful robot. Draw it and label three things it can do.

- 1 _____
- 2 _____
- 3 _____
