

COLOUR WALKING WATER

Can water walk from one cup to another?

1 QUESTION

Can water walk from one cup to another?

2 PREDICTION

What do you think will happen?
Draw or write your prediction.

3 MATERIALS

Tick what you will need.

5 clear cups

Water

Red food colouring

Yellow food colouring

Blue food colouring

Paper towel

4 WHAT TO DO

1. Fill the cups as shown in the picture.
2. Fold paper towels into strips.
3. Place one end in each cup so the paper towel touches the water.
4. Watch the colours walk and mix!

5 WHAT HAPPENED?

Write your observations.

What did you see happen? _____

What colour did red and yellow make in the empty cup between them? _____

What colour did yellow and blue make in the empty cup between them? _____

What happened to the water over time? _____

Great scientists ask questions, make predictions, observe and learn!
